

# GETTING READY

FIRST STEPS FOR FEDERAL AGENCIES: ASSESSMENT

To effectively achieve their core missions, federal agencies need to have the right people, a clear strategy and vision, and sufficient resources. But as budgets shrink and the scopes of missions expand, federal executives must find every opportunity to improve operational efficiency and reduce costs.

By sharing resources and services across common management and mission areas, otherwise known as "shared services," federal agencies can leverage efficiencies of scale and improve the quality of their core operations by working within an entire department and, ideally, across departments.

This guide will focus on the Assessment Phase of implementing shared services at a federal agency. Through the 5 components of the Assessment Phase, agencies will develop a clear plan to lead them into the implementation of shared services.

#### STEPS FOR PLANNING AND IMPLEMENTING SHARED SERVICES

#### · Design business · Develop shared services ☐ MOBILIZATION processes management processes Define shared services vision Design the organization Build performance support and strategic objectives and training materials Design the enabling technology Recruit shared services ☐ FUNCTIONAL ANALYSIS leaders Develop a Collect data and conduct Draft service-level communication plan benchmarking agreements Plan workforce transition Develop key performance **OPERATING MODEL** Develop a training

plan and management

development program

management framework

Design service

- Develop the operating model
- ROADMAP Develop initial implementation plan
- **BUSINESS CASE** Develop the business case

indicators

Determine workforce

- · Execute deployment
- Confirm service-level agreements
- Conduct training and work shadowing Develop and
- deliver deployment communications
- Test shared services center readiness
- Execute workforce transition plan

MOBILIZATION FUNCTIONAL OPERATING MODEL ROADMAP BUSINESS CASE

#### WHAT DECISIONS DO YOU NEED TO MAKE?

Before embarking on the 5 components of the Assesment Phase of implementing shared services, agencies need to make certain decisions. The first set of key decisions involves the agency's intent and the capacity and capability to migrate to a Shared Services Provider (SSP).

STRATEGIC INTENT	What is the strategic intent of moving to a shared services provider? Cut costs dramatically? Deliver or obtain better service?
SCOPE OF SHARED SERVICES	What is the right scope of shared services for the agency? Which functions? Financial management, human resources, information technology, mission? Technology only vs. full-service migration?
FIT WITH CURRENT INITIATIVES	How does shared services fit with current initiatives underway? How will the initiatives be aligned?
SHARED SERVICES OPERATING MODEL	What capacity and technology-integration needs will be required from a shared services platform?
CHANGE MANAGEMENT REQUIREMENTS	How should the change be managed to ensure that goals are achieved, buy-in is secured and a new high-performing operating model is created?
IMPLEMENTATION STRATEGY	What is the portfolio of initiatives required to implement shared services? How should they be prioritized? How should we organize the program?
COST and BENEFIT ASSESSMENT	What service and economic benefits are feasible? What level of investment will be required? What are the key risks to be managed?

ROADMAP

BUSINESS CASE

#### CONDUCT ANALYSIS ON:

## **People and organization**

- ☐ Workforce baseline and labor union considerations (if any)
- ☐ Current resources
- ☐ Capacity and feasibility of transition to shared services

#### **Process**

- ☐ Targeted business functions through market research to make comparisons and understand capabilities of providers
- ☐ Current performance levels
- ☐ Current processes
- ☐ Needed capacity and feasibility of transition to shared services
- ☐ Best-in-class practices
- ☐ Past, current and planned initiatives
- ☐ Compliance with federal policies and procedures (from audits, etc.)

## Technology

- ☐ Current technology resources
- Past, current and planned technology initiatives
- ☐ Aging or end-of-life technology inventory
- ☐ Assessment to determine needed technological capacity and feasibility of transition to shared services
- ☐ Best-in-class practices
